

***„Hands-on Development Strategies in a Content-Centered Context  
for Young and Adult Learners with Poor Basic Skills  
in Literacy and Numeracy”***

### **Intellectual Outputs 3**

In May 2017, the Teachers’ Training Center from Tulcea/Romania organized the training programme ”Teaching strategies for developing basic skills of students with learning difficulties”, having as target group teachers from the school units in Tulcea County.

Structured in a preponderantly applied format, the course has helped to improve the skills needed to design and carry out remedial education and socio-educational support activities, as well as to design inclusive practices/approaches to integrate pupils/students with learning difficulties.

It comprised three modules:

Literacy (Motivation for learning to young people with literacy problems; Efficient techniques and methods for learning/literacy);

Integrated Mathematics (Curriculum in Mathematics; Mathematics and environment exploration; Practical applications regarding the integrated approach of mathematics);

Integration of students with learning difficulties in the school environment (What is a vulnerable group; Why should vulnerable groups/people be integrated; Ethnocentrism of the groups).
